

# " De videoconferentie volgens Belgacom " Tom Jansseune, Technical Consultant

---

**By 2020:**  
**+26% mobility need**  
**+35% time lost in traffic**

# Videoconferencing provides solutions for different challenges in the healthcare

## Specialisation: care becomes more complex

- Patient is seen by different careproviders, on different locations. Videoconferencing allow them to align

## Rationalisation

- Due to the hospital merges, rationalisation between hospitals requires more collaboration between different departments on different sites.

## Collaboration

- Complexity of treatments require important collaboration between different careproviders, not only into the hospital, but also outside.

## Aging population

- Videoconferencing, or videophony allows to build solution to increase social interaction with elderly people staying at home.

# Belgacom, a unique value proposition

A solution for every need

## End to end product portfolio

- From Desktop to Telepresence
- Multipoint equipment
- Network equipment
- Recording and streaming

### Support services

- Reporting
- Monitoring
- Multipoint as a Service
- Call setup
- Maintenance
- Installation & Training

### Leading edge vendors

# Innovation and healthcare

Innovation is a major driver of growth in our sector.

One example is e-health services: an innovative field where Belgacom is working on.

Belgacom aims at offering technologies, products and services that respect environment and help our customers managing their climate change impact.
